

**Maintenance and Asset Support  
Services for Airline Operators**

No matter your needs, Honeywell can design our comprehensive Aftermarket Programs around your specific requirements to meet both your current objectives and long-term strategic goals.

# Cost-effective solutions to improve

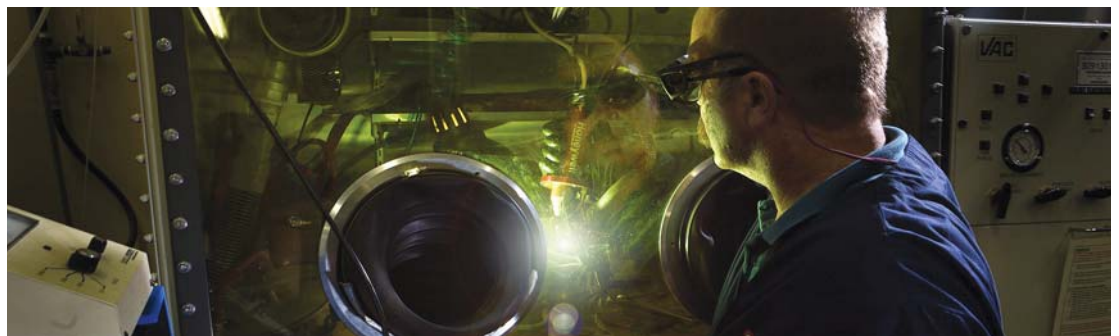

By being uniquely positioned in the marketplace as a premier provider of total aerospace service solutions, Honeywell helps you maintain your competitive edge by supporting your operations throughout the life span of your aircraft. From service agreements and innovative repairs to logistics and parts availability, our aftermarket programs are focused on solving your specific challenges and adding value across your entire organization.

As no two airlines are the same, we can customize our maintenance and asset availability services to create cost-effective packaged solutions that allow you to better manage and predict your maintenance spending, asset requirements and repair needs, while lowering operating expenses with a reduced total cost of ownership.

## Maintenance Solutions

By delivering the right level of repair resources, our maintenance solutions help you to manage your maintenance budget while keeping your systems and equipment at peak operational performance:

- Usage-Based Programs
  - Hourly Maintenance Agreements – Pricing based upon a fixed dollar amount per flight hour.
- Event-Based Programs
  - Component and Advanced Repair – Specialized techniques and technologies for repairing your Honeywell and certain non-Honeywell systems and components to a like new condition.
  - Flat-Rate – A single price point regardless of the repair and maintenance work scope.

# operational efficiencies.

– Not-to-Exceed (NTE) – A time and material model that charges set labor rates and the costs of parts with a set price cap for repair costs.

■ Information Services

– Database Subscription – Ensures aircraft will have the most current operational database information.

**Asset Availability**

Tailored to your specific operational requirements, Honeywell's asset availability solutions can simplify your maintenance, logistics and spare equipment support by providing aircraft equipment exactly where and when it is needed:

- Integrated Service Solution (ISS)/Regional Asset Pools – Simplify your maintenance, logistics and spare equipment support through our comprehensive ISS equipment support offering or gain access to regional equipment pools.
- Exchange Banks – Cost-effectively return your aircraft to service as rapidly as possible through our streamlined LRU exchange services.
- Rental Banks – Keep your aircraft operational during repairs by renting components from our spare equipment inventory.

- Aerospace Trading – A complete range of pre-owned Honeywell system components that are reconditioned to OEM standards with full documentation.

**Global Network of Support Services**

Honeywell's resources span the Americas, Europe, Middle East, Africa, Asia and the South Pacific to deliver dedicated 24/7 service support. As a world leader in aviation aftermarket services, our global repair centers, logistics network and field services engineering teams are able to quickly repair, supply, and warranty equipment whenever and wherever it is needed.

**Key Program Benefits**

- Single source solution for comprehensive aftermarket support services
- Coordinated programs designed to reduce maintenance costs and improve reliability
- Streamlined parts availability with deliveries where and when parts are needed
- Simplified maintenance, logistics and spare equipment support
- OEM-quality engineering expertise

## **Honeywell Aerospace**

Honeywell is a leading global provider of integrated avionics, engines, wheels and brakes systems and service solutions for aircraft manufacturers, airlines, business and general aviation, military, space and airport operations.
