

**Maintenance, Logistics and
Materials Management Solutions
for Aircraft Equipment**

For effective operations, airlines must dispatch aircraft on time and decrease ownership costs. Honeywell Asset Availability solutions provide the comprehensive support required to meet your operational needs.

Getting the right parts, exactly when

By simplifying your maintenance, logistics and spare equipment availability, we provide needed aircraft equipment when and where it is needed to best support your operations. Tailored to your specific needs and business requirements, you'll keep your aircraft operational and greatly reduce AOG delays by ensuring a rapid response from our comprehensive offering of asset availability solutions. From exchange and rental services to a full range of maintenance, logistics and materials management programs, our solutions are designed to reduce administrative costs and help you to better manage up-front capital investments, while lowering inventory carrying costs and facility space requirements.

Each of our solutions additionally features a full range of 24/7 customer service and program support capabilities from Honeywell's global network of service and customer support centers. Our range of asset availability solutions is proven to deliver improved availability, shorter turnaround times, and the highest quality aerospace parts for lower total costs of aircraft ownership.

Integrated Service Solution (ISS)/ Regional Asset Pools

With the comprehensive ISS support offering, Honeywell can manage the logistics, repair and spare equipment inventory required to support your aircraft fleet, so that spares are always available for your critical equipment. You benefit from a single integrated program with one agreement and predictable periodic payments to guarantee global asset availability. Our Regional Asset Pools use negotiated rates for quick access to a regional pool of spare equipment inventory. Here you'll find dispatch-critical LRUs on hand, and conditional equipment spares ready at a Honeywell facility for rapid exchange within a 24- to 72-hour turnaround time.

and where you need them.

Exchange Banks

Our exchange banks provide a cost-effective means to minimize turnaround time and return your aircraft to service with streamlined equipment availability. Upon notification, Honeywell will immediately send you a serviceable replacement unit, while you send the removed unit to Honeywell for repair and restocking.

Rental Banks

As a viable option to keep your aircraft operational during repairs, our rental banks for specific, often-needed equipment categories can greatly reduce your need to carry large on-site spares inventories and provide rapid access to the exact parts that you require for a rental fee.

Aerospace Trading

When new OEM parts are not available, our Aerospace Trading services deliver a complete range of pre-owned Honeywell system components that are reconditioned to original OEM standards with full documentation. Featuring more choices, including hard-to-find parts and system components, Aerospace Trading delivers faster service and increased value across your entire line of Honeywell aerospace products.

Global Network of Support Services

Honeywell's resources span the Americas, Europe, Middle East, Africa, Asia and the South Pacific to deliver dedicated 24/7 service support. As a world leader in aviation aftermarket services, our global repair centers, logistics network and field services engineering teams are able to quickly repair, supply, and warrant equipment whenever and wherever it is needed.

Key Program Benefits

- Parts availability where and when they are needed.
- Simplified maintenance, logistics and spare equipment support
- Lowered operational expenditures by reducing inventory carrying costs, facility space requirements and infrastructure needs
- Better cost predictability and management of up-front capital investments
- Convenient exchange and rental programs to keep your aircraft operational during repairs

Honeywell Aerospace

Honeywell is a leading global provider of integrated avionics, engines, wheels and brakes systems and service solutions for aircraft manufacturers, airlines, business and general aviation, military, space and airport operations.
