

**Tailored Maintenance,  
Repair and Overhaul Services  
for Your Operations**

Now, more than ever, airline operations require reductions in maintenance spend with measurable improvements in aircraft reliability. Honeywell delivers a full range of customizable maintenance solutions to meet your ever changing business needs.

## Your source for hard to find Honey

Honeywell's maintenance solutions deliver the right level of engineering expertise, maintenance and support resources to help manage your maintenance spending while keeping your systems and equipment at peak performance. We understand your unique needs, and can structure reliable and efficient maintenance service and support programs to meet both your current operational objectives and long-term strategic goals.

### Usage-Based Programs

- Hourly Maintenance Agreements – With pricing based upon a fixed dollar amount per flight hour, our hourly maintenance agreements provide you with a more predictable cost structure and improved aircraft dispatchability, as we diligently work to increase the reliability of your components and systems.

### Event-Based Programs

- Component and Advanced Repair – Our ongoing investments in state-of-the-art technologies help create highly specialized techniques for repairing your Honeywell and certain non-Honeywell systems and components to a like new condition. Honeywell's innovative repairs deliver increased value through longer on-wing performance, reduced scrapping of expensive components, and a lower total cost of ownership. We can additionally help you to better manage and predict maintenance spend through cost-effective advanced repair processes that reduce unscheduled repairs and maintenance and extend product life. Our expertise and proven technologies makes us an industry leader in adaptive machining systems, laser welding, brazing and thermal processing, surface treatments and advanced coatings.

# well equipment.

- **Flat-Rate** – Offering the advantage of a stable, predictable cost structure, our flat-rate programs offer a single price point regardless of the repair and maintenance work scope. Typically requiring an exclusivity requirement, these types of maintenance programs create a consistent maintenance budget with the confidence of knowing your repair needs are covered.
- **Not-to-Exceed (NTE)** – Based on a time and material model that charges set labor rates and the costs of parts, our not-to-exceed contracts set a top-end ceiling on repair costs. These programs limit your cost exposure by setting a price cap for your repair and maintenance expenses.

## Information Services

- **Database Subscription** – To make sure you receive the latest updates, our database subscription services ensure your aircraft will have the most current operational data for improved route efficiencies and up-to-date airport information. For a yearly subscription fee, you will receive thirteen cycle updates every twenty-eight days. Other subscription options based upon fleet size and provider licensing are also available.

## Global Network of Support Services

Honeywell's resources span the Americas, Europe, Middle East, Africa, Asia and the South Pacific to deliver dedicated 24/7 service support. As a world leader in aviation aftermarket services, our global repair centers, logistics network and field services engineering teams are able to quickly repair, supply, and warranty equipment whenever and wherever it is needed.

## Key Program Benefits

- Customizable event- and usage-based programs for lower maintenance costs
- Predictable maintenance expense through cost-effective processes that can reduce unscheduled repairs and maintenance and extend the life of products
- OEM-quality engineering expertise
- Database subscription services to provide the most up-to-date data

## **Honeywell Aerospace**

Honeywell is a leading global provider of integrated avionics, engines, wheels and brakes systems and service solutions for aircraft manufacturers, airlines, business and general aviation, military, space and airport operations.
