

sky-high savings

IntuVue = Safety + Efficiency

Honeywell offers dependable safety technology so pilots can make smarter real-time decisions and airlines can see impressive real-number savings in areas like fuel efficiency. Our IntuVue 3-D weather radar provides pilots with the most advanced predictive tools and up-to-date weather information. The result is a smoother ride with 45% fewer turbulence encounters and more efficient re-routing around weather — thereby reducing fuel-burn.

Safety + Efficiency. It's all part of how our values add up to equal significantly stronger bottom lines. That's because at Honeywell, it's not only about building better airplanes, it's about providing better business solutions.
