

SmartLanding™

Safe 'til you stop.

Here are more statistics that are hard to ignore: runway excursions cost the aviation industry \$900 million per year and account for 83% of runway fatalities. Honeywell's new SmartLanding helps reduce the risk of runway excursions by alerting pilots during unstable approaches and long landings. Safe from start to stop. Together, SmartRunway and SmartLanding provide a powerful continuum of awareness from takeoff to landing.

Honeywell

SmartLanding is an easy software upgrade to Honeywell's Enhanced Ground Proximity Warning System (EGPWS).
